For everything you need to know about tires
and wheels, visit our website Info Center at
discounttire.com/infocenter.I never thought shopping for tires would be fun
but the people at Discount Tire make it enjoyable.
Jenn

TIPS TO IMPROVE TIRE MILEAGE AND SAFETY

- ✓ **Rotate your tires** every 6,000 to 8,000 miles or as needed to address uneven treadwear.
- ✓ **Rebalance your tires** every other rotation to promote even treadwear and a smooth ride.
- ✓ **Check your air pressure** at least once a month and before long trips. The manufacturer recommended air pressure can be found on the vehicle placard (usually inside the door jamb or in the owner's manual).
- ✓ **Maintain vehicle alignment** and replace worn suspension parts.
- ✓ **Inspect tires** regularly for excessive or uneven treadwear. Be sure to check the tread and sidewall for cuts and other damage as well.
- ✓ **Replace worn-out tires** when tread depth is below 4/32". Visit discounttire.com/tire-safety to learn more about your numbers for tire safety.
- ✓ **Feel free to return** to any Discount Tire store for a free tire safety inspection.

TPMS - Tire Pressure Monitoring System
See This? (1) Come See Us!

The TPMS indicator on your dash lights up after a 25% loss in air pressure in one or more of your tires. If you see the TPMS light, you should get your tires checked right away.

We recommend checking your air pressure at least once a month and before road trips. Tires lose pressure over time, and because the TPMS indicator only comes on

after a 25% loss in air pressure, your tires may be low enough to impact performance and fuel efficiency **before** your warning light comes on.

Think your tires might be low on air pressure? Feel free to stop by your neighborhood Discount Tire for a free tire air check and safety inspection.
